Verification Round Plan PC-2015-03 Has Begun

The Plan for Verification Round PC-2015-03 is now available and can be found here. In total, 77 investigations are planned, and the Round has already begun. This Round will focus on Level 2 and Level 3 investigations, and involve laboratory evaluation of tablets/slates registered in the United States.

In Level 2 investigations, the Conformity Assurance Body (CAB) buys or borrows a product without the Manufacturer's knowledge or involvement and has the product disassembled and inspected to assess conformance with one or more criteria.

In Level 3 investigations, the CAB obtains a product without the Manufacturer's knowledge or involvement and has the product analytically tested to assess conformance with one or more criteria.

All products have already been obtained for this Verification Round, and Manufacturers will be notified by their CAB if one of their registered products was selected for investigation.

You can click here to download Verification Round Plan PC-2015-03.
