Imaging Equipment Verification Round Launching

The third and final Verification Round for Imaging Equipment is set to begin within the next week. In this round, a lab will evaluate two randomly chosen Imaging Equipment products and conduct Level 2 and Level 3 investigations on 13 criteria (as applicable).

Imaging Equipment Subscribers who have previously been involved in this type of verification will not be included in this round.

Please [click this link](#) if you would like to learn more about Verification Round IE-2014-03.

Television Verification Round Will Launch Soon

The second Verification Round in 2014 for Televisions is set to begin within the next week. In this round, a lab will evaluate two randomly chosen Television products and conduct Level 2 and Level 3 investigations on 14 criteria (as applicable).

In addition, this Round will include four (4) investigations chosen using a random number generator to select both the criteria and the product.

All active Television Subscribers will be included in this round.

For more information about Verification Round TV-2014-02, please [click here](#).

Have You Taken an Online Training Recently?

EPEAT's [Online Learning Center](#) has pre-recording training modules for every criterion in the 1680.1, 1680.2, and 1680.3 standards. These modules are designed to demystify the standards' requirements, and to illustrate the types of information needed during a Verification Round.

Participating Manufacturers with questions about what information is needed to demonstrate conformance to a specific criterion may want to review these modules.

If you do not yet have access to the Training Center, please [contact Andrea Desimone](#), and she will help you get started.
