Registry Software Updates

The EPEAT Registry software was updated this past weekend with some general enhancements and several specific bug fixes. A full list of updates is [available at this link](#). A brief overview of some of the fixes is included below.

- Detailed declaration information available on the printer-friendly view of the product display page
- Ensure a product goes to the appropriate Desk Review status when changing PREs
- Add a "View Criteria by Product Category" button
- Add the ability for a Subscriber to choose "N/A" for criterion 4.6.2.1 (PCs & Displays)
- Address criterion 4.3.3.1 to allow a future date for a product going on the market (Imaging Equipment)

If you have a question about any of the enhancements on the [full list of updates](#), please contact a member of the EPEAT Conformity Assurance staff: Jeff Omelchuck ([email](#)), Susan Herbert ([email](#)) or Erin Gately ([email](#)).

Join Us for Criteria Training Webinars

EPEAT's Conformity Assurance Managers will be holding interactive training webinars about a number of specific criteria for the PCs & Displays, Imaging Equipment, and Televisions standards. These interactive sessions are designed to help Participating Manufacturers improve their understanding of complex criteria and prepare for upcoming verification rounds. View the full schedule and criteria to be covered [at this link](#).

Imaging Equipment Clarification (Criterion 4.10.1.1)

Clarification 30 has just been published for Imaging Equipment criterion 4.10.1.1. This Clarification arose from questions posed by EPEAT Participating Manufacturers regarding the requirements. This Clarification determines functional equivalence between Blue Angel RAL-UZ 122 and Blue Angel RAL-UZ 171. Participating Manufacturers may use either RAL-UZ 122 or RAL-UZ 171 to calculate emissions pertaining to criterion 4.10.1.1 Clarification 30 [can be found here](#).

India Expansion Update

Director of Stakeholder Engagement Sarah O'Brien will travel to India during the first half of April for a series of stakeholder meetings. Co-hosted by Indian organizations including the Manufacturers Association for Information Technology (MAIT) and the Confederation of Indian Industry's Centre of Excellence for Sustainable Development, these sessions will focus on how manufacturers can begin registering devices and how purchasers can make use of EPEAT to "green" their electronics selection. Please [email Sarah directly](#) if you would like to participate, or if you wish to suggest events in India that would be appropriate to include in her agenda.

India Registration Instructions

Registration instructions are now available for EPEAT Participating Manufacturers who wish to begin India product registration. The instructions [may be downloaded here](#) and are also available from your [My Account](#) page.

Opt-In to Receive Future India News

Interested in receiving future news and tips about registering products in India? Hoping to stay up-to-date on EPEAT purchaser engagement or to participate in system launch events? Make sure you [opt-in to our India email list](#) to receive the latest updates as soon as they're available.

EPEAT Event Marketing -- Will You be There?

EPEAT-registered electronics will be a hot topic at several events in 2014. We would like to maximize exposure at these events by cross-promoting with manufacturers wherever possible. If your marketing team plans to attend any of the events below, please [contact us](#) so we can coordinate outreach, include your EPEAT collateral at our booth and perhaps showcase EPEAT-registered devices.

- Green Schools Conference ([late March](#))
- Ingram Micro's "IM One" event ([early May](#))
- National Assoc. of Educational Procurement Conference - District VI ([late September](#))
- AASHE Annual Conference ([late October](#))

In addition, if your marketing team is attending any events not listed above and may be interested in EPEAT-related support, please [contact Jonas Allen](#) to discuss how we can work together to promote your EPEAT participation.
