First 2014 TV Verification Round Enters Second Phase

The first Television Verification Round of 2014 includes two phases, a Level 2 investigation phase with no manufacturer involvement, and a Level 1 phase that requires manufacturer input. With the Level 2 investigations complete, the Level 1 phase has now begun.

The Level 2 investigations involved Qualified Verifiers reviewing publicly available information to assess conformance. The PVC recommended that the Level 2 investigations, which required no work on the part of Participating Manufacturers, be broken up into two categories: Conformance or Inconclusive.

If the investigation was found Conformant, no Participating Manufacturer action will be required. If it was found Inconclusive, the investigation will move to a Level 1 phase. Investigation Reports have been created for all Level 2 investigations. Some of the criteria did not lend themselves to reviewing publicly available data. These criteria will only be investigated via Level 1.
